# Remanufacturing – for good reasons

It all starts with the used component, the core, which is the raw material of the remanufacturing process. The cores are completely disassembled, thoroughly cleaned and inspected in order to determine their condition. Cores not fulfilling our stringent requirements are discarded and the raw materials recycled.

Components fulfilling the criteria are restored to what is, technically, new condition. Wear parts and those not fulfilling the criteria are replaced with new genuine parts. All components are organized to correspond to the bill of material, which contains all design changes to secure that what is remanufactured always fulfills our latest technical specifications. When the components are reassembled, they are carefully tested to verify product performance.

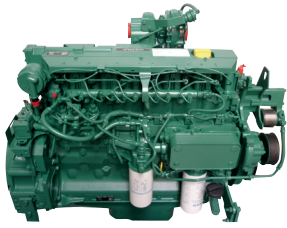

Finally, the component is painted, to give it the same finish as a new part.

In all aspects, Volvo Penta Reman components are technically new. And what's more - used components have been given a new life as Reman components – up to 85 per cent of the raw material has been recycled through the remanufacturing process.

## **Good reasons for Volvo Penta Reman components:**

- Completely remanufactured to new condition by Volvo Penta
- Same quality and warranty as new Genuine Volvo Penta Parts
- Updated to the latest technical specifications
- Cost-effective alternative to repair and overhaul
- Less environmental footprint, up to 80% energy saved
- Higher uptime when choosing Reman instead of re-powering
- Lower ownership and operating costs

## IPS

IPS is available as complete drive, as well as separate units for upper gear, steering unit servo (SUS) and lower gear including intermediate housing.

**Note!** Complete drive is delivered without upper tension ring, propellers, rubber rings and steering unit servo (SUS).

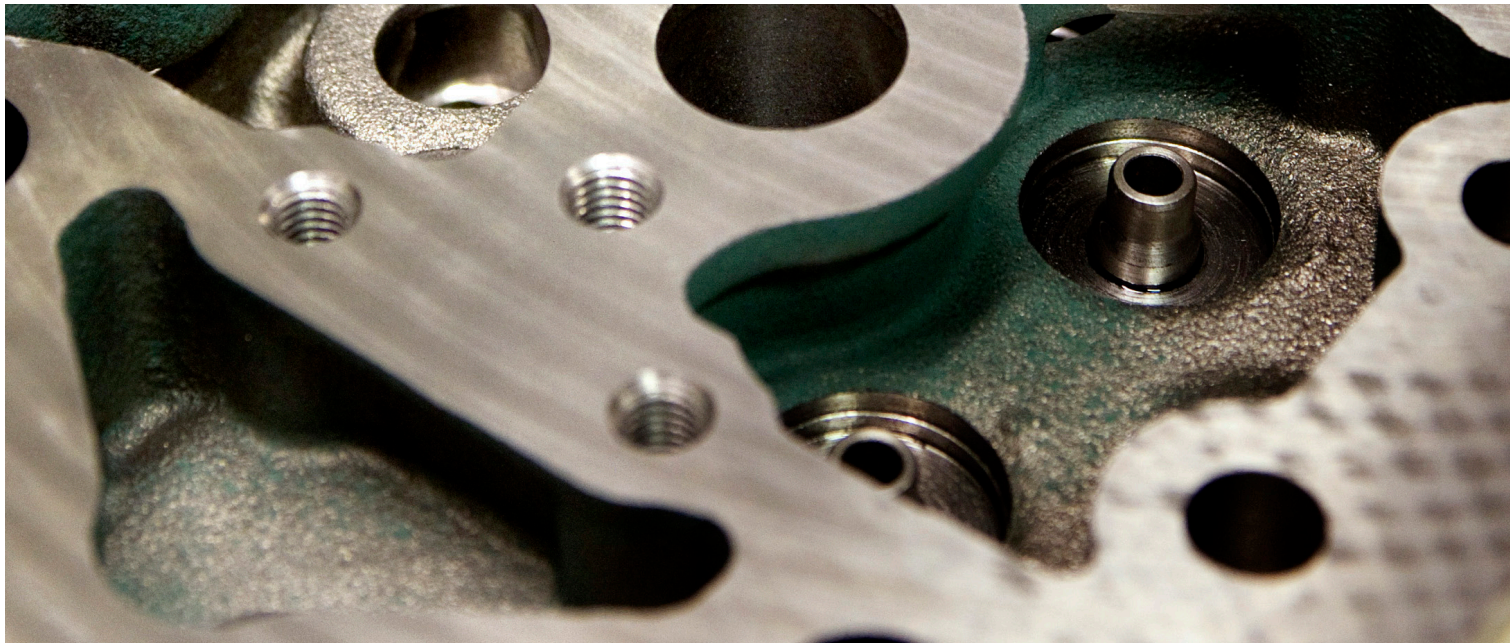

## Core return

Volvo Penta Reman System is based on a recycle program where you return a corresponding worn component (the core) in return for a new Reman component. The program allows you to return the worn component once the new component is installed and the engine is running again.

### Core fee

When buying a Reman component, a core fee will be added on the invoice. The core fee is refunded as soon as the worn component (the core) is returned.
